

Demo Site 40 - Liquid Solutions

Liquid Solutions provide expert advice in the supply of equipment for processing, filtration and bottling of liquids.

We are just starting to create a new web site for Liquid Solutions at liquidsolutions.co.uk. The new site will feature a very modern and highly technical design which is intended to appeal to a niche sector of the drinks manufacturing industry.

The new site will be easy to modify so that on-going development costs are minimised.

The following image shows a simple and modern design in keeping with the image of Liquid Solutions with one simple easy to use navigation menu.

Testimonial:

"Liquid Solutions is ..."

Pete Arguile, Director of Liquid Solutions

Currently Liquid Solutions's new site has undergone some search engine optimisation. We have been contracted to provide search engine optimisation (SEO) tools to ensure that Google finds (and likes) Liquid Solutions's website contents. We will also be providing tools for auto-configuring the meta tags and will be submitting the site for google's spiders and crawlers to find. Other optimisation will follow. Liquid Solutions's new website is aimed at a particular market and when Scott Lewis, Liquid Solutions's owner decide that she needs to penetrate new markets we will fully optimise the site, enabling a Google Adwords campaign and ensuring the world knows about the site.
