

Demo Site 23 - Huntington House B&B

Huntington House, one of the most comfortable and friendly Bed and Breakfast accommodations in Oxfordshire.

We are just completed a new web site for Huntington House at Huntington-House.co.uk. The new site feature sa Joomla CMS front-end using a traditional country template which matches the character of Huntington House. The new site will be easy to modify so that on-going development costs are minimised. We are currently training the owners to modify the content themselves.

The following image shows a simple and traditional design in keeping with the image of Huntington House with two main navigation menus.

Testimonial:

"This is to testify that the web design of our site to advertise our Bed and Breakfast establishment was carried out as per our request to a very high standard of workmanship. Dean Beedell is very skilled, motivated, and extremely computer literate.

We would have no hesitation in recommending his company for similar work.

"

Mike and Julie Huntington of Huntington House.

The new website is based upon Joomla CMS. Please Click on the image below to visit Huntington House's new website.
